Installation

Choosing a location

Before choosing an installation location for your projector, take the following factors into consideration:
• Size and position of your screen
• Electrical outlet location
• Location and distance between the projector and the rest of your equipment
You can install your projector in the following ways.

1. Front-Desktop:
Select this location with the projector placed near the floor in front of the screen. This is the most common way to position the projector for quick setup and portability.
Turn on the projector and make the following settings:
setting > Projection Settings>Projection Method >Front-Desktop

2. Front Ceiling:

Select this location with the projector suspended from the ceiling in front of the screen. Turn on the projector and make the following settings:
setting > Projection Settings > Projection Method >>front ceiling

Operation

Starting up the projector

1. Plug the power cable into the projector and a power outlet. Turn on the power outlet switch (where fitted). The POWER indicator light on the projector lights red after power has been applied.

Please use the supplied power cable to avoid possible dangers such as electric shock and fire.

2. Press the power button on the projector or remote control to start the projector. As soon as the lamp lights up. The POWER indicator remains blue when the projector is turned on. The fans start operating, and a start-up image is displayed on the screen while it warms up. The projector does not respond to further commands while it is warming up.

2.Adjust the image

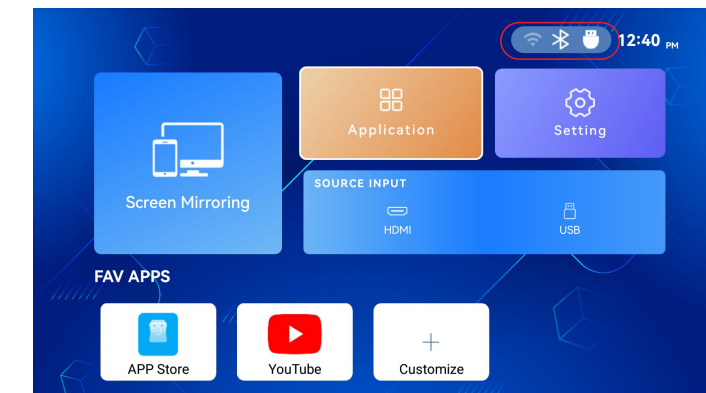

Connecting HDMI devices

HDMI (High-Definition Multimedia Interface) supports uncompressed video data transmission between compatible devices like Laptop, DTV tuners, DVD players, Blu-ray players and displays over a single cable.
