Thank you for choosing Egate. We appreciate your business and strive to ensure complete peace of mind.

E.G.O.E. Any matter or legal dispute will be entertained in the jurisdiction of Mumbai Court only.

6 Maintenance of the projector

The smart projector is a high-tech product integrating precision optics, electronics and machinery. If not regularly maintained, projector performance, effectiveness, and lifespan could be affected. The importance of regular and proper maintenance is as follows:

- Dustproof:** Excessive dust on the projector may affect heat dissipation. Clean the dust filter every one and a half months.
- Ventilation:** As the light source generates heat, ensure that airflow through the projector air vents are not obstructed. Reduced air flow will affect projector performance and lifespan.
- Lens Maintenance:** Lens performance is core to projector performance as poor maintenance affects image quality. Regularly use a soft cotton cloth to clean the lens surface. Do not use a hard cloth or something corrosive. Wipe the lens.
- Cleaning:** Clean regularly with a cotton cloth to avoid dust build-up as it may affect heat dissipation.
- Moisture-proof:** Ensure that the humidity is between 45% - 60%. A higher air humidity may affect performance.
- Shockproof:** Ensure that the projector is not exposed to impacts, vibration, or shocks whether during operation, storage, or in transit.
- Do not install the projector on an unstable, shaky or uneven table.
- Do not place containers with liquid on top of the projector.

7 Product Warranty Policy Description

- The product may be returned within 7 days of purchase with a valid receipt, and the three-guarantee certificate only if the failure is not the result of negligence or misuse. The warranty conditions will apply.
- If the product is returned within 8 - 15 days of purchase with a valid receipt, and the three-guarantee certificate, due to a product malfunction but not the result of negligence or misuse, then the product will be replaced.
- The product warranty is effective for a period of 13 months from the date of production, is limited to the projector and excludes all accessories supplied. A free maintenance service is only valid on submission of a valid purchase receipt and the three-guarantee certificate.
- The company has the right to interpret the Three Guarantees Service which does not cover the following:
 - The equipment shell (housing), manual, packaging, promotional items, and random gifts.
 - Disassembly, modification, or damage caused through upgrades by the user.
 - Using spare parts not manufactured or sold by the company.
 - Damage through not following the instruction manual.
 - Failure to provide a valid purchase receipt and a valid three-guarantee certificate.

8 Warranty Card

WARRANTY CERTIFICATE E-GATE

The manufacturer warrants this product to be free from defects in material and manufacturer's workmanship for a period of 1 year from the date of purchase. This warranty is subject to proper installation and usage as it is intended to be used as mentioned on the Egate's website. The manufacturer will not be liable for any electrical, mechanical or consequential damages in any way related to, or arising out of, defects in, or damage to the goods. Egate and our website may require you to locate your nearest service center.

1 Important Notes

How to use the device correctly:

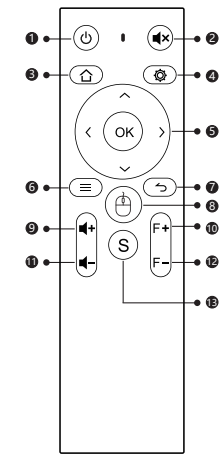

- To avoid eye damage, do not point the lens towards the eyes when the light source is on.
- To avoid damage and overheating of the electronics, do not block the air inlet/outlet or vents.
- To avoid damaging the lens, do not use paper, cloth, or cleaning tools to wipe the lens. Use a blower to remove any dust particles.
- Keep the projector, parts, and accessories out of reach of children.
- Ensure that the projector is used in a dry and well-ventilated environment. The allowable operating temperature range is from 0°C to 35°C.
- Do not store the projector in hot, cold, humid, or damp locations.
- Do not place any pressure on the projector or any shielding above or behind the projector.
- Do not expose the projector to any shock, vibration, impact, liquid droplets or splashes.
- Disassembling or attempting to repair the projector will invalidate the warranty. Contact an authorised repair service centre.
- Do not place any object on the projector.
